Lab 0 Rubric: Graphing Activity (Hand Plot vs. Excel Plot)

Out of 10 points. This is the rubric on the LB0-M0 assignment in Brightspace. Graphing Activity page · Word copy · PDF copy

Criterion	Pts	Excellent	Good	Developing	Missing / Inadequate
Hand Plot	3	**3** Axes scaled to fill most of the grid page; both labeled with units, Time (s) and Position (m), with evenly spaced ticks; descriptive title; all ten points plotted as a scatter plot, not connected.	**2** Plot complete, but one item slips: a missing unit or title, a cramped scale, or a point misplotted.	**1** Two or more items missing, or the points connected dot-to-dot, or the scale squeezed into a corner.	**0** No hand plot, or the photo is too blurry or dark to read.
Best-Fit Line and Slope	2	**2** A single straight best-fit line drawn with a ruler through the scatter; two well-separated points on the line circled and labeled; rise-and-run triangle drawn; slope = rise/run worked on the plot with the unit m/s.	**1.5** Line and slope present, but the two points are close together or are data points, or the unit is missing.	**1** Line drawn freehand or forced through particular points, or the slope given with no work on the plot.	**0** No best-fit line or no slope.
Excel Table and Graph	2	**2** Data table and scatter chart pasted as pictures, side by side and in line with text; chart has a title and axis titles with units; markers only; linear trendline showing its equation and R^2.	**1.5** Table and chart present; one element missing, such as R^2, an axis unit, or the chart title.	**1** Default Excel formatting, points joined by lines, no trendline equation, or the table or the chart missing.	**0** No Excel work.
Observe and Comment	2	**2** In sentences: states the Excel best-fit equation; reports the Excel slope and the hand-plot slope, both in m/s, as the speed; compares them (for example as a percent difference) and accounts for any gap.	**1.5** Both slopes reported with units, but the comparison is thin or the equation is missing.	**1** Only one slope reported, units missing, or no comparison.	**0** No comment section.
Format and Submission	1	**1** On the Word template, two pages or fewer, italic instructions deleted, name and date in the heading, submitted as one PDF named "Graphing Activity - Your Name.pdf".	**0.75** One slip: leftover instructions, a third page, or the file name.	**0.5** Several slips, or the template not used.	**0** Not submitted as a PDF, or unreadable.
Total	10				

Overall: Excellent 9+ · Good 7.5+ · Developing 5+ · Missing / Inadequate below 5.
