Algebra Review Sheet

This exercise contains equations that we will use during the semester. Don't worry about the meanings of the variables yet: We will look at the details as the semester progresses.

For now, just answer each of the questions to the best of your ability. Once you have solved each of the questions, enter them into the associated lesson in Brightspace.

Ask for help on ones that you don't remember how to do.

1. Solve the equation $v = f \cdot \lambda$ for f.
2. Solve the equation $f = \frac{1}{T}$ for T.
3. Solve the equation $\frac{f_o}{V - v_o} = \frac{f_s}{V - v_s}$ for f_s.
4. Solve the equation $\frac{f_o}{V - v_o} = \frac{f_s}{V - v_s}$ for v_s.
5. Solve $V = V_o + 0.610t$ for t.
6. Solve the equation $P = \frac{E}{t}$ for t.
7. Solve the equation $P = \frac{E}{t}$ for E.
8. Solve the equation $I = \frac{I_s}{4\pi R^2}$ for I_s.
9. Solve the equation $I = \frac{I_s}{4\pi R^2}$ for R.
10. Solve $V = V_o + 0.610t$ for V_o.
